

# Green ENERGY

## "Renewable Energy, Green Future"

A light presentation for those who are worried about the world climate disaster knocking on our doors- due to the use of dirty energy from fossil sources. The only way to save our world is to rapidly change to Renewable Clean Energy sources such as: Biomass, water (hydropower), wind, solar, waves, etc...

This very unique presentation and workshop are presented by Mr. Shlomo Gilboa, chairman and retired CEO of an Israeli company - SeaNergy Electric Ltd which developed unique technologies to utilize renewable energy, mainly from waves and hydroelectric sources.

Mr. Gilboa is passionate about green energy solutions and is also enjoying consulting governments, universities, scientific research institutes, and many worldwide companies like GE and Tata concerning alternative electricity sources and seawater desalination off-grid supply to remote and disaster areas.

You are invited to participate, ask and share thoughts in this amazing and educational workshop.
