

DESALINATION & ELECTRICITY FROM WAVE ENERGY

SeaNergy

Developed a unique, patented ground breaking innovation for harvesting Clean Electricity and Desalination from **RIVERS , WAVES & VERY LOW WATER FALLS** SeaNergy's technology is based on locking a buoy and releasing it only at the maximum water level. This release creates an immense burst of energy which generates huge amount of electricity.

Turbo Outburst Power for Low Head rivers & reservoirs

Low Head Turbines
Water lifting & Wave Energy

New! Reverse Gravity – Revolutionary Water Pump We lift water 24/7 to any head and any volume!

- ✓ SeaNergy new system manipulates water with reverse gravity to lift any volume of water to any height with a fraction of the electricity
- ✓ Applications: HydroElectricity, Irrigation, Municipality water, reservoirs & Desalination
- ✓ Instead of pumping water to the reservoir during off peak hours, using high cost electricity, SeaNergy pumps the water 24 Hours a Day ! For free !
- ✓ SeaNergy new system pumps the water, utilizing natural renewable POWERS with NO need to purchase electricity at all !
